

COLLAGEN

Takes care of your joints

- With Highly Bioavailable Collagen Peptides
- Contributes to Bone and Cartilage Health
- With Hyaluronic Acid, Magnesium, and Vitamin C

Collagen is a protein found in connective tissue that is essential for the elasticity and regeneration of skin, bones, and cartilage.

The ingredients in **Weider's Collagen** have been carefully selected to stimulate collagen production, helping to regenerate bones and cartilage. Additionally, its exceptional formula is perfect for protecting the skin from aging and oxidative damage, keeping it smooth and youthful for longer.

Collagen is low in fats and sugars, mixes very well, and is very easy to use. It is perfect for any age, whether you are young and want your joints to keep up with your physical activity, or if your joints are already starting to bother you. And of course, it's also for you if you want to protect and enhance the natural beauty of your skin. Now available in a new vanilla flavor, ideal for mixing with your protein shake or with natural yogurt. Naturally sweetened with a calorie-free sweetener derived from stevia leaves.

Why is Collagen different from other collagens?

- **Collagen Peptides (100% Peptan®)**: Bioactive peptides from bovine collagen. Hydrolyzed collagen is easily digested and absorbed, making it highly tolerable. Additionally, it does not cause food allergies.

NOT all collagens are the same: There are different types of collagen depending on their source. **Peptan®** is type I collagen, the same type found in human skin and bones. Peptan® is produced using the highest quality manufacturing processes. To enhance absorption and bioavailability, collagen must be hydrolyzed, and **Peptan®** undergoes a careful enzymatic hydrolysis process that preserves all the properties of its bioactive peptides. Peptan® is the leading collagen brand, supported by clinical studies on efficacy and safety, and contains no additives or preservatives.

- **Magnesium:** An essential mineral for maintaining bone and muscle health. The magnesium in Collagen is magnesium citrate, the best-absorbed and highest quality form.

- **Vitamin C:** An essential vitamin for the proper formation of collagen fibers. Additionally, vitamin C is a powerful antioxidant that helps combat oxidative damage and protects the skin, cartilage, and bones from aging. Collagen provides 100% of the recommended daily amount of vitamin C.

- **Hyaluronic Acid:** A compound naturally present in the human body, especially in the cartilage and skin. It provides hydration and plays an important structural role. It perfectly complements the function of collagen peptides, vitamin C, and magnesium.

PRESENTATION:
300g / 30 servings

DIRECTIONS FOR USE:
Take one serving per day (10 g of product dissolved in 200 ml of water).

RECOMMENDATION:
You can dissolve Collagen in your favourite drink, yoghurt or even enrich your post-workout shake.

FLAVOR: Vanilla.

ZERO SUGAR ⁽²⁾
ZERO FAT ⁽²⁾

HYALURONIC ACID

MAGNESIUM

VITAMIN C

Ingredients: 91% Collagen Peptides (Peptan®), Magnesium Citrate, Flavouring, L-Ascorbic Calcium (Vitamin C), Hyaluronic Acid, Sweetener: Steviol Glycosides from Stevia. May contain traces of gluten, crustaceans, eggs, fish, peanuts, soybeans, milk, nuts, lupin and sulphites and products thereof.
