

SPORT COLLAGEN

Much More Than Just Collagen

- Enzymatically Hydrolyzed Collagen
- Highly Bioavailable Turmeric
- Enriched with Magnesium, Glucosamine, Silicon, and Hyaluronic Acid

Sport Collagen is an advanced product designed for bone and joint care. The formula is based on hydrolyzed collagen, known for containing the best functional ingredients used in joint care:

- **Collagen Peptides (100% Peptan®)**: Bioactive peptides from bovine collagen. Hydrolyzed collagen is easily digested and absorbed, making it highly tolerable. Additionally, it does not cause food allergies.

NOT all collagens are the same:

There are different types of collagen depending on their origin. Peptan® is type I collagen, the same type found in human skin and bones. Peptan® is produced using the highest quality manufacturing processes. To enhance absorption and bioavailability, collagen must be hydrolyzed, and Peptan® undergoes a careful enzymatic hydrolysis process that preserves all the properties of its bioactive peptides. Peptan® is the leading collagen brand, supported by clinical studies on efficacy and safety, and contains no additives or preservatives.

- **Turmeric Extract (CURSOL)**: Turmeric is widely known for its antioxidant, antimicrobial, and anti-inflammatory properties. However, conventional turmeric is poorly soluble and therefore difficult to absorb. This means large amounts of turmeric are needed to achieve its benefits. CURSOL is a doubly patented active ingredient that offers a soluble and therefore highly bioavailable form of turmeric, allowing the beneficial effects of turmeric to be obtained with minimal doses. Just 280 mg of CURSOL per day is enough to achieve its benefits!
- **Organic Silicon**: Silicon is a crucial mineral in collagen synthesis, connective tissue, and bone formation. The silicon in Sport Collagen is organic silicon derived from bamboo, with a purity of 75%.
- **Magnesium**: An essential mineral for maintaining the health of bones and muscles.
- Additionally, this innovative formula is enriched with **hyaluronic acid, glucosamine, and vitamin C**.

Whatever the reason you're considering taking collagen—whether you exercise, lead an active lifestyle, or have been advised to take it for preventive care—**Sport Collagen** is the most complete option you can find. It offers the best combination of ingredients to nourish and protect your joints, but don't just take our word for it—try it yourself!

PRESENTATION:

600g / 60 servings
300g / 30 servings

DIRECTIONS FOR USE:

Take one serving per day (10 g of product dissolved in 200 ml of water).

FLAVOR: Lemon.

TURMERIC C
EXTRACT

GLUCOSAMINE

ORGANIC
SILICA

Mg
MAGNESIUM

Ingredients: 86% Bovine Collagen peptides, D-Glucosamine, Turmeric extract (Stabiliser: Calcium Phosphate; Emulsifier: Polysorbate 80; Turmeric Rhizome Extract (Curcuma longa L.), Acidity Regulator: Citric Acid), Acid: Citric Acid; Magnesium Carbonate, Bamboo Extract (Bambusa bamboss (L.) Voss), Calcium-L-Ascorbate (Vitamin C), Natural Flavouring, Hyaluronic Acid, Sweeteners: Sucralose, Steviol Glycosides from Stevia.
