

MICROBIOTIC SPORT IMMUNE

Probiotic mix for athletes

1 billion live bacteria

Boosts your immune system

Reinvigorates your intestinal flora

Microbiotic Sport is a live bacteria complex especially formulated to reestablish intestinal flora and immune systems in athletes and active people.

During periods of high-intensity training, your physical and psychological energy demands increase. This can trigger a bodily response to counteract stress and affect your defenses and may even result in infections that may slow you down.

Your digestive system is directly related to your immune system since a very important part of our defenses is in the intestine. The intake of beneficial bacteria can make the difference when it comes to athletes achieving top results.

Microbiotic Sport provides you with 1 billion beneficial bacteria derived from seven strains chosen with the athlete especially in mind, combined with fiber, vitamins, and minerals.

• **7 strains of live bacteria:**

- Bifidobacterium bifidum
- Lactobacillus acidophilus
- Bifidobacterium breve
- Lactobacillus fermentum
- Lactobacillus rhamnosus
- Bifidobacterium lactis
- Lactobacillus plantarum

• **Prebiotic fiber:**

Resistant dextrin, which acts as an indigestible fiber that feeds the live bacteria and helps them grow.

• **Vitamins and minerals:**

Vitamin D and Vitamin B12: they contribute to the correct functioning of your immune system.

Zinc: as well as boosting your immune system, zinc helps reduce oxidative stress.

At Weider we are constantly on the cutting-edge of innovation and safety, which is why we have used a cannister featuring patented technology that prevents humidity, enabling the live bacteria to reach the end of their shelf life.

Look after yourself from the inside!

Nutritional Information	Per capsule
Vitamin D	1,5 µg
Vitamin B12	0,75 µg
Zinc	1,5 mg
Bifidobacterium bifidum, Lactobacillus acidophilus, Bifidobacterium breve, Lactobacillus fermentum, Lactobacillus rhamnosus, Bifidobacterium lactis, Lactobacillus plantarum.	1x10 ⁹ CFU/ KbE
Resistant Dextrin	54 mg

Ingredients: Bulking Agent: Microcrystalline Cellulose; Hydroxypropyl methylcellulose (Capsule Shell); resistant dextrin; Bifidobacterium bifidum, Lactobacillus acidophilus, Bifidobacterium breve, Lactobacillus fermentum, Lactobacillus rhamnosus, Bifidobacterium lactis and Lactobacillus plantarum, Anticaking Agents: Magnesium salts of fatty acids, Zinc Sulphate, Vitamin B12 (Cyanocobalamin), Vitamin D (Cholecalciferol).

PROFESSIONAL ADVICE

RECOMMENDATION: Take 1 capsule a day on an empty stomach.

PRESENTATION: Tin of 30 capsules.
