

HYDRO ENERGY GEL

Energy and Maximum Hydration for your Most Demanding Workouts!

More Liquid Texture.

Easy and Pleasant to Take.

Available with and without Caffeine.

Hydro Energy Gel by **Victory Endurance** is an innovative gel designed to give you more energy and hydration during physical exercise.

When you are dehydrated by practicing sports, sometimes conventional gels can be too dense or it's just not possible to drink any water at that moment. Hydro Energy Gel is designed for just those times. It has a much more liquid texture, as it simply contains more water.

As a source of energy, **Hydro Energy Gel** provides you with a combination of complex and simple carbohydrates, in the form of maltodextrin and dextrose, both of which absorb rapidly, releasing energy quickly. Because of maltodextrin's high molecular weight and the gel's high water content, Hydro Energy Gel is easily digested.

Hydro Energy Gel is also enriched with the branched-chain amino acids leucine, isoleucine, and valine to protect your muscles against wasting. And it contains taurine and arginine to contribute to athletic performance.

To make the **Hydro Energy Gel** Formula even more complete, vitamins and mineral salts, such as sodium, potassium, and magnesium, have also been added.

And lastly, remember that it comes in two versions, one with caffeine and the other stimulant-free. By mixing the gels together, you can get the active ingredients in the proportions you need.

INGREDIENTS: Water, maltodextrin, dextrose, acidulant: malic acid; BCAA's (L-Leucine, L-Isoleucine, L-Valine), magnesium carbonate, potassium chloride, natural flavoring, L-arginine, preservative: potassium sorbate; taurine, sodium chloride, sweetener: sucralose; vitamin B6 (pyridoxine hydrochloride), vitamin B1 (thiamine hydrochloride).

INSTRUCTIONS FOR USE: Take a gel every 20-30 minutes during exercise.

PRESENTACIÓN: 70 g.

FLAVOURS: Apple, Red fruits + Caffeine.

PROFESSIONAL TIPS: The two flavours Apple (without Caffeine) and Red Fruits + Caffeine can be useful, depending of the type of required active principles you need in different situations.
